Sunrise General Hospital — Department of Dentistry

Mock reference document for AI agent (RAG) — all data below is fictional/placeholder and should be replaced with real hospital data before production use.

1. Department Overview

The Department of Dentistry at Sunrise General Hospital provides general and specialized dental care, including preventive, restorative, surgical, and emergency dental services.

- Department Name:** Sunrise General Hospital - Dental Department
- Location:** Building B, 3rd Floor, Sunrise General Hospital, 123 Ratchada Road, Bangkok, Thailand
- Phone:** +66-2-123-4567 (ext. 305)
- Email:** dental@sunrisehospital.example.com
- Languages supported:** Thai, English

2. Operating Hours

Day	Hours
Monday	08:00 - 20:00
Tuesday	08:00 - 20:00
Wednesday	08:00 - 20:00
Thursday	08:00 - 20:00
Friday	08:00 - 20:00
Saturday	09:00 - 17:00
Sunday	Closed
Public Holidays	Closed (except Emergency Dental Unit)

Emergency Dental Unit: Open 24/7 for trauma, severe pain, or uncontrolled bleeding. Located at Building A, Emergency Department, Ground Floor.

Last walk-in registration: 1 hour before closing time. **Lunch break (front desk, non-emergency):** 12:00 - 13:00 (dentists rotate, so some rooms remain open).

3. Services & Estimated Costs

*All prices are in Thai Baht (THB) and are **estimates only**. Final cost depends on case complexity, materials used, number of teeth involved, and whether general or local anesthesia is required. Prices exclude hospital admission fees if applicable. Patients should confirm final pricing with the billing counter or their insurance provider.*

Service	Description	Estimated Price Range (THB)	Typical Duration
Dental Consultation / Check-up	Initial exam, X-ray review, treatment plan	300 - 600	20-30 min
Dental Cleaning (Scaling & Polishing)	Removal of plaque/tartar	800 - 1,500	30-45 min
Dental Filling (Composite)	Per tooth, cavity restoration	800 - 2,500	30-60 min
Root Canal Treatment (RCT)	Per tooth, includes 2-3 sessions	6,000 - 15,000	3 sessions
Tooth Extraction (Simple)	Non-surgical, single tooth	500 - 1,500	15-30 min
Tooth Extraction (Surgical/Wisdom Tooth)	Impacted or complex extraction	3,000 - 8,000	45-90 min
Dental Crown	Per tooth, porcelain/ceramic	8,000 - 20,000	2 sessions
Dental Bridge	Per unit, 3-unit average	25,000 - 60,000	2-3 sessions
Dentures (Partial)	Removable, per arch	8,000 - 25,000	Multiple sessions
Dentures (Full)	Removable, per arch	15,000 - 40,000	Multiple sessions
Teeth Whitening	In-office bleaching	4,000 - 12,000	60-90 min
Braces / Orthodontics	Full treatment (metal braces)	40,000 - 90,000	18-30 months
Clear Aligners	Full treatment	80,000 - 180,000	12-24 months
Dental Implant	Per tooth, including crown	45,000 - 90,000	3-6 months (multi-stage)
Pediatric Dental Care	Check-up, fluoride, sealants	300 - 2,000	20-40 min
Gum Treatment (Periodontal)	Deep cleaning for gum disease	3,000 - 10,000	1-2 sessions
Emergency Dental Visit	After-hours pain/trauma management	800 - 3,000	Varies

Payment methods accepted: Cash, credit/debit card, hospital installment plan (for treatments above 20,000 THB), select insurance providers (see Section 6).

4. Common Symptoms & Guidance

This section helps the agent triage patient-reported symptoms. This is general information only and does not replace an in-person diagnosis. The agent should always advise seeing a dentist for confirmation, and

direct patients with severe symptoms to the Emergency Dental Unit.

Symptom	Possible Causes	Urgency Level	Suggested Action
Mild tooth sensitivity to hot/cold	Enamel wear, minor cavity, gum recession	Low	Schedule regular check-up
Persistent toothache (dull, ongoing)	Cavity, early pulp infection	Medium	Book appointment within a few days
Severe throbbing tooth pain	Deep decay, pulpitis, abscess	High	Book urgent appointment / same-day visit
Swollen face or jaw with fever	Dental abscess, spreading infection	Emergency	Go to Emergency Dental Unit immediately
Bleeding gums when brushing	Gingivitis, plaque buildup	Low-Medium	Schedule cleaning & check-up
Loose permanent tooth (no injury)	Advanced gum disease, bone loss	Medium-High	Book appointment promptly
Knocked-out tooth (trauma)	Injury/accident	Emergency	Go to Emergency Dental Unit immediately; preserve tooth in milk or saline
Broken/chipped tooth, no pain	Trauma, biting hard object	Medium	Book appointment within a few days
Jaw pain / clicking sound	TMJ disorder, teeth grinding	Low-Medium	Schedule consultation
Bad breath (persistent)	Gum disease, poor hygiene, cavities	Low	Schedule check-up
Mouth ulcers lasting >2 weeks	Various; rule out other conditions	Medium	Book appointment for evaluation
Numbness/tingling after dental work	Possible nerve involvement	Medium-High	Contact department promptly
Uncontrolled bleeding after extraction	Post-surgical complication	Emergency	Go to Emergency Dental Unit immediately

Triage rule for agent: If a patient describes “swelling + fever,” “uncontrolled bleeding,” “trauma/knocked-out tooth,” or “difficulty breathing/swallowing,” the agent should immediately recommend the Emergency Dental Unit or calling emergency services, rather than booking a routine appointment.

5. Frequently Asked Questions (FAQ)

Q: Do I need a referral to see a dentist? A: No referral is needed for general dental consultations. Specialist treatments (e.g., orthodontics, oral surgery) may require an internal referral from the general dentist after initial assessment.

Q: Can I walk in without an appointment? A: Walk-ins are accepted based on availability, but appointments are recommended to reduce wait time. Emergency cases are always prioritized.

Q: Do you treat children? A: Yes, the Pediatric Dental service treats children from age 2 and up. A parent/guardian must accompany minors.

Q: Is X-ray included in the consultation fee? A: Basic X-rays needed for diagnosis are usually included in the consultation fee; additional imaging (e.g., panoramic X-ray, CT scan) may incur extra charges.

Q: How do I cancel or reschedule an appointment? A: Appointments can be cancelled or rescheduled up to 3 hours in advance via phone or the hospital app, free of charge. Late cancellations may incur a 200 THB fee.

Q: Do you accept insurance? A: Yes, the department works with select insurance providers (see Section 6). Patients should bring their insurance card and ID on the day of visit.

Q: How long does teeth whitening last? A: Results typically last 1–3 years depending on diet, smoking habits, and oral hygiene.

Q: Is dental treatment covered under social security / government health schemes? A: Limited coverage may apply (e.g., emergency extractions, certain check-ups). Patients should confirm eligibility with the billing office.

6. Insurance & Billing

Accepted insurance providers (mock list): - Bangkok Health Insurance Co. - Thai Life Assurance - Global Care Insurance - Sunrise Hospital Corporate Health Plan

Installment plan: Available for treatments exceeding 20,000 THB, subject to credit approval at the billing counter.

Refund policy: Refunds for prepaid treatment packages are available within 30 days if treatment has not started, minus an administrative fee.

7. Booking & Contact

- **Phone booking:** +66-2-123-4567 (ext. 305), available during operating hours
 - **Online booking:** via Sunrise General Hospital app or website
 - **Walk-in:** Building B, 3rd Floor, front desk
 - **Emergency:** Building A, Emergency Department (24/7)
-

8. Notes for AI Agent Behavior

- Always clarify that cost estimates are **non-binding** and may change after in-person diagnosis.

- Never provide a definitive medical diagnosis; only general guidance and urgency levels.
 - Always recommend booking an appointment or visiting the Emergency Dental Unit for anything above “Low” urgency.
 - If asked about symptoms suggesting a medical emergency (e.g., difficulty breathing, high fever with swelling, uncontrolled bleeding), instruct the patient to seek immediate emergency care or call emergency services.
 - Do not recommend specific medications or dosages; advise the patient to consult the dentist or physician.
 - If a query falls outside dental scope (e.g., general medical symptoms unrelated to teeth/gums/jaw), direct the patient to the appropriate hospital department.
-

End of document. This file is a fictional/sample dataset intended for testing a Retrieval-Augmented Generation (RAG) pipeline for a hospital dental department chatbot. Replace all placeholder data with verified, up-to-date information before deploying in a real clinical setting.
